---

A Nature envisagement of the Aurora's dialogue between the Moon and the Sun was conceptualized by the moon-shaped silver aluminium Hangzhou Grand Theatre and the emerging rising golden titanium sun Hangzhou International Conference Centre.

The omnipresent auric refulgent sphere encircles the HICC five stars plus Hotel, where a multi-storey atrium with panoramic elevators leads guests to the elevated lounge and front desk, located over the meeting, board rooms and conference centre facilities. The upper part of the sun, luxuriating in magnificent views, contains the amenities, spa, gym, and pools.
